Materials:
ABS: Used for bodies, dip tubes, extensions and spigot adaptors. A cost effective, fire resistant material.
Nickel Bronze - BS EN 1982: Used with satin finish for gratings, funnels and access covers. A cast alloy with a fine grain effect which blends well with most floor finishes. The satin finish is generally maintained by the slight abrasive action of passing traffic. In unused areas the material will gradually tarnish. To restore lustre, apply a plain nylon scouring pad (not soap-filled) in the direction of grain.**Note: Avoid covering nickel bronze items with plastic sheeting after installation, otherwise blackening may occur.**

All dimensions are in millimetres unless stated. In line with general practice all dimensions shown are nominal.
